

# eRefresh

*Don't throw out your old electronics. Refresh Them!*

## Our I.T Refresh System

Our system consists of a 3 pronged win-win-win approach:

**1)** By turning custody of your retired electronics over to us, we can help you regain capital for business. Through years of working in the I.T industry, we've established a vast network of vendors, nationally and internationally, that strongly support our system. This makes it much easier to refresh, then sell your assets, and put money back in your pockets. Our highly trained technicians work diligently to restore your assets to their original state to help bring you the greatest return. We've developed our "Re-Pay™" payment tracking system to make keeping track of every penny, as simple as possible...all for free!

**2)** By refreshing old assets, we help keep electronics out of the landfills, preserving our environment but also returning much needed capital to your business.

**3)** We are committed to the communities we live and work in. We show this by donating electronics to charities, Educational and Community initiatives on your behalf.

### What type of electronics can we process?

Thanks to our dedicated refurbishing and storage facilities, we can process various types of electronics in an efficient manner!

<b>Computers &amp; Accessories</b> Desktop Computers, All-In-Ones, Laptops, Computer Towers, RAM, Processors, Motherboards, Monitors, Keyboards, Mice, AV equipment and Servers.	<b>Smartphones &amp; Communications Equipment</b> All smartphone devices or peripherals from all brands. Desk phones or IP phones, switchboards and "Walkie Talkies"/Radios.	<b>Networking Equipment</b> Routers, POE/Non POE Switches, Access Points, LAN cables and various peripherals.

## How do we do it?

eRefresh utilizes a completely custom and proprietary asset tracking system that allows you to track all of your I.T assets and follow them through our process in real time!

### Comprehensive Asset Tracking

We take the guesswork out of keeping track of your retired assets. We ticket your item(s) and offer a virtual dashboard that allows you to track the status of each individual item from anywhere with a working internet connection.

### Advanced Asset Restoration

Our restoration strategy aims to return devices to their original state and apply any potential upgrades. This allows us to increase the overall value of the item as well as your overall return.

### Electronic Waste Reduction / E-waste Disposal

We are proud to have partnered with some of the best E-cyclers to ensure that any of your non-salvageable assets are disposed of in an environmentally-responsible manner.

### Data Security

We take data security seriously! Using military-grade data destruction software, we ensure all drives are wiped clean and any and all asset tags are removed prior to processing. We guarantee no one will capture your private or confidential information that may have been left on the device.

### Re-Pay™

By tracking every electronic asset thoroughly from start to finish, we ensure that you'll be paid accordingly, and provided a detailed report for every single item we process for you.

1

### Assessment & Logistics

We start by assessing the volume of your electronic assets to facilitate the logistics and transportation requirements.

2

### Transport & Processing

Now the fun part! The items are transported to our processing facility for ticketing and testing to be carried out by one of our trained Electronics Technicians.

3

### Distribution & Sale

Once the items are processed, we distribute them to one of our numerous sales channels, bringing more cash back into your business.
